What You'll Get

This four-week synchronous online course is designed to help you improve your online teaching. Each session is facilitated by an expert in online teaching and learning. Throughout this course, you will have the opportunity to apply learning theories and uncover innovative teaching strategies that promote student learning and engagement. Fundamental topics, principles of effective online teaching, and content you can put to immediate use are included.

Apply facilitation skills in a safe environment with real-time feedback. Experience an online course from the student perspective, including attendance, homework, and contracted grading. Leveled certification issued by the International Teaching Learning Cooperative is available upon completion of the course.

Learning Outcomes

By the end of this course, participants will be able to:

• Evaluate the benefits of online versus traditional in-person instruction
• Align effective course design with learning outcomes
• Use dynamic facilitation to enhance student engagement
• Implement a variety of media into any online course
• Leverage technology to maximize critical thinking in an online environment
• Support online student success
• Iteratively improve your online course and facilitation skills

Course Schedule*

8 one-hour synchronous sessions across a 4 week period, held Tuesday and Thursday from 1:00 - 2:00PM EDT. All sessions are facilitated by an expert online instructor.

Target Audience

• Faculty who are relatively new to online teaching
• Faculty who want to improve their online courses

Technical Requirements

Participants must have a computer, phone, or tablet capable of creating and uploading video. Access to their campus online course environment is highly encouraged.
